SICK-ROOM ISOLATION

Two sheets suspended over the doorway and kept moist with Platt's Chlorides, diluted one to four, presents a practical method of isolating an infectious case.

"Platt's Chlorides" is an odorless, colorless liquid; a powerful disinfectant and prompt deodorizer, and is endorsed by over 25,000 physicians. It is sold everywhere by druggists, in quart bottles only and manufactured by HENRY B. PLATT, Cliff Street, New York.

FORMULA—A combination of the saturated solutions of Chloride Salts, proportioned as follows: Zn 40 per cent., Pb 20 per cent., Ca 15 per cent., Al 15 p.r. cent., Mg 5 per cent., K 5 per cent.

THE SANITARIUM FOR NERVOUS AND GENERAL DISEASES is beautifully situated near the town of Livermore, 30 miles from San Francisco, and is surrounded by handsome grounds. It is isolated, the rooms are large and well furnished and the Sanitarium is specially adapted for the treatment of Neurasthenia, Nervous Dyspepsia, the Alcohol Habit and Morphomania. One building is especially adapted for Massage, Electricity, Hydrotherapy and Sun Bath. Terms \$30.00 to \$75.00 per week.

Address J. W. ROBERTSON, M. D., DRAWER S, LIVERMORE, CAL.

SAN FRANCISCO OFFICE, 218 STOCKTON ST. (Mondays, Wednesdays, Fridays, 1 to 3 P. M. Tel. Private Exchange 226)

THE DEPARTMENT FOR THE TREATMENT OF MENTAL DISEASES is entirely separated from the Sanitarium and is located in grounds absolutely private. The central building is surrounded by small cottages for the better segregation of patients. The best-trained nurses are employed and all modern appliances for the proper care of the insane have been provided. Absolutely no restraint nor enclosures for patients. Terms \$25 to \$50 per week, depending upon the number of nurses required.

A Distinction AND a Difference

To confirm our previous statements relative to **HEMABOLOIDS** and to define our claims for this preparation, we herewith emphasize

1—What It Is Not, and 2—What It Is.

1st—HEMABOLOIDS

IS NOT (and never has been) a so-called “peptonate” or “albuminate” of iron.

IS NOT (and never has been) a so-called “blood iron”; it does not contain blood, but makes blood.

IS NOT (and never has been) an inorganic or metallic salt of iron.

2d—HEMABOLOIDS

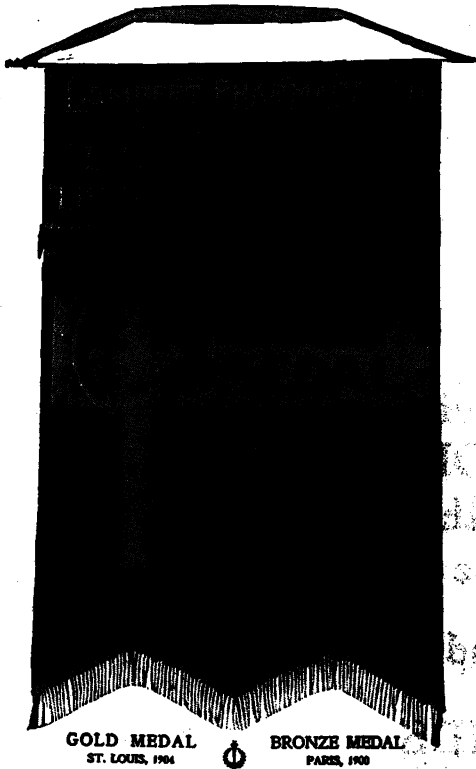

IS a solution of ferruginous nucleo-proteids obtained from vegetables rich in iron, plus a synthetic organic iron compound.

IS not only a hematinic, but also contains immediately assimilable proteids.

IS equal in actual iron content (one tablespoonful) to 15 minims Tr. Ferri Chlor.

DOSE—One tablespoonful
3 or 4 times a day.

The Palisade Mfg. Co.
Yonkers, N.Y.

GOLD MEDAL
ST. LOUIS, 1904

BRONZE MEDAL
PARIS, 1900

Listerine Dermatic Soap

An antiseptic detergent for use in
the antiseptic treatment of
diseases of the skin.

LISTERINE "Dermatic" Soap contains the essential antiseptic constituents of eucalyptus (1%), mentha, gaultheria and thyme (ea. 4%), which enter into the composition of the well-known antiseptic preparation Listerine, while the quality of excellence of the soap-stock employed as the vehicle for this medication, will be readily apparent when used upon the most delicate skin, and upon the scalp. Listerine "Dermatic" Soap contains no animal fats, and none but the very best vegetable oils; after its manufacture, and before it is "milled" and pressed into cakes, a high percentage of an emollient oil is incorporated with the soap, and the smooth, elastic condition of the skin secured by using Listerine "Dermatic" Soap is largely due to the presence of this ingredient. Unusual care is exercised in the preparation of Listerine "Dermatic" Soap, and as the antiseptic constituents of Listerine are added to the soap after it has received its surplus of unsaponified emollient oil, they retain their peculiar antiseptic virtues and fragrance.

A sample of Listerine Dermatic Soap may be had upon application to the Manufacturers

Cutter's Diphtheria Antitoxin (U. S. P.) in New Package

Piston slides easily, yet does not permit escape of serum back of plunger.

AS IMPROVED, CUTTER'S PISTON SYRINGE CONTAINER

is the most convenient and dependable one on the market, and a sample package (of Serum), will be sent to any physician on request.

"Therapeutically your Serum is the peer of any," recently wrote a very well known physician who has used hundreds of thousands units of our Antitoxin in the last year, and now the package is mechanically perfect.

AS A "TRUST-BUSTING" PACIFIC COAST PRODUCT

that has already caused a break in the ranks of the combine, Cutter's Antitoxin certainly deserves your active support. It is still the lowest priced of any, and is exchangeable for fresh after expiration of date on package. Please ask your druggist to carry stock, and insist on being supplied with our product.

DURING DENTITION

the natural and safe development of the child requires extreme care in effecting the necessary change from an all-milk diet to more elaborate food. Under ideal conditions there should be an increase in certain proximate principles without overtaxing the yet undeveloped digestive organs. The new teeth should begin exercising their function of incising and masticating food. This food should contain all the elements required for the sturdy and efficient development of the teeth and of the bony frame of the body. At this stage "baby food" is not indicated, but something more "maturing" in its composition should be given the child.

EGG-O-SEE

is a valuable "maturing" food at this period of the child's life. It is honestly made from whole wheat, is easily digested and assimilated, and contains all the proximate principles required by the child from the beginning to the conclusion of dentition. It is rich in protein, carbohydrates and the mineral elements of wheat, is invitingly acceptable to the palate and the appetite and is physiologically as well as esthetically satisfying.

Egg-O-See is an absolutely clean food. It is steam cooked, flaked, baked in sanitary ovens constructed for the purpose, and placed in inner-lined, germ-proof packages by mechanical process under the strictest hygienic conditions. In recommending Egg-O-See you are going *back to nature* for the full value of her best cereal food—food that will build up a sturdier, heartier and happier generation.

Full size package will be sent to physicians on request.

BATTLE CREEK BREAKFAST FOOD COMPANY, Limited
QUINCY, ILL., and BUFFALO, N. Y.

Stearns' Point - PRICE
Stearns' Reason - NO EXCHANGE
Stearns Quality - THE HIGHEST

Your patient will save \$1 on a 3000 unit package of antitoxin (50 cents on 2000 units, or 25 cents on 1000 units) if you order Stearns' for him. And on what you buy for your own use you will save about \$2 on 3000 units (\$1.25 on 2000 units, 68 cents on 1000 units) by ordering Stearns', for druggists allow physicians 25% discount from our list on serum purchases for personal use.

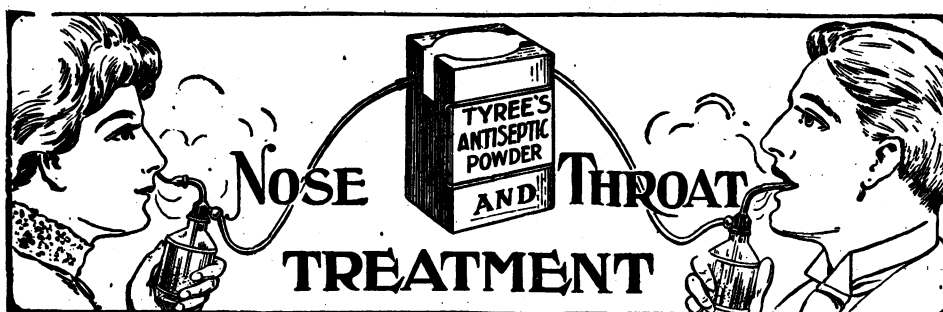

Let nothing obscure the issue. Stearns' antitoxin costs you this much less than formerly—and as much less than others now—simply because it is not exchangeable.

We abandoned the exchange plan of marketing it, so that, by wiping out that expensive feature, we might sell it at the present low price. No other antitoxin can surpass ours in life-saving effectiveness, in safety or in purity; none can equal its convenience of administration.

Exchangeable serums cannot give you better satisfaction—they merely cost you more money. And that extra cost is the tax paid by the user to perpetuate a wasteful, extravagant and out-of-date method of marketing.

On account of its superior quality, its lower cost and its greater convenience of administration, Stearns' antitoxin deserves your preference.

FREDERICK
STEARNS
& COMPANY
DETROIT, MICH., U. S. A.
WINDSOR, CANADA. LONDON, ENG. NEW YORK CITY

Solutions of Tyree's Antiseptic Powder have for their object the mechanical removal of morbid secretions, accumulations and foreign bodies, as well as antiseptic and diagnostic purposes. It is a practical solvent of the substance to be removed, is perfectly soluble in water and forms a clear solution. Is non-irritant to mucous membranes and sensitive surface, insures thoroughness and possesses the power of penetrating the surface tissues; is an effective antiseptic alkaline cleaner, consequently requires no chemical compatibility with other alkalines and antiseptics for the removal of morbid secretions and the healing of diseased tissues. It is economical in cost and readily available, when added to water it forms a clear and permanent solution which has a specific action against those disagreeable catarrhal products so commonly met with in the nose and naso-pharynx.

The usual proportion is from one to two teaspoonfuls to a pint of water. To prevent substitution and insure prompt results specify TYREE'S POWDER in original packages at twenty-five cents and one dollar.

J. S. TYREE - CHEMIST - WASHINGTON, D. C.

Formula—Parts, sod. bor., 50; alum, 50; ac. carbol., 5; glycerin, 5; the cryst. principles of thyme, 5; eucalyptus, 5; gaultheria 5, & mentha 5

IODOFORMAL

THE IDEAL ANTISEPTIC DRESSING

Iodoformal, (A new definite synthetic compound of Cinchonine Iodo-Sulphate, Thymol Iodide, Bismuth Oxyiodide, Boro-Formaldehyde, Phenylacetamide with Phenic Acid) is a brownish yellow, light powder with a faint, not disagreeable, phenol-like odor, which when decomposed liberates Iodine, Formaldehyde, Thymol, and Phenic Acid. It is a most efficient local antiseptic, analgesic, and astringent and its use is indicated in practically all dermal affections. Being non-toxic and non-irritating it is applicable in many conditions where other antiseptics are not available. It is put up in 1 oz. amber bottles with special aluminum sprinkler top; which makes it most convenient of application as a dusting powder. A sample bottle with explanatory literature will be sent to any registered physician applying for it direct to the originators and manufacturers.

Diabetes Mellitus

"A disorder of nutrition."—*OSLER*.

"There is sufficient evidence available to establish beyond the possibility of a doubt the fact that there is some connection between the pancreas and diabetes. Although it is not yet proved, yet it is becoming increasingly probable that the pancreas is diseased in all cases of diabetes mellitus. An increasing bulk of evidence is also accumulating to show that the function of the pancreas which is in abeyance in diabetes is normally performed by certain special groups of cells known as the Islands of Langerhans, which are distinct from the ordinary secreting cells of the gland."—*BOSANQUET*.

Trypsogen (G. W. Carnrick)

Is the logical treatment of Diabetes suggested by the latest accepted physiological and pathological findings, and clinical reports of the most positive character prove it to be a successful treatment of this grave affection.

TRYPSOGEN: Each 5-grain tablet contains the tryptic enzymes of the islands of Langerhans, together with Gold Bromide, 1-100 grain, Arsenic Bromide 1-200 grain.

The following interesting pamphlets now ready: "*The Islands of Langerhans—Their Relation to Diabetes Mellitus*," illustrated with colored plates, showing the islands in a normal pancreas; also pathological changes in these islands where subject died from Diabetes. These photographic plates are accurate enlargements from microscopic slides and are, we believe, the first illustrations of the kind ever published; also "*Nature of Diabetes Mellitus*," a resume of Bosanquet's recent Gouldstonian Lectures before the Royal College of Physicians and Surgeons, London—a copy of each mailed to physicians on request.

TRYPSOGEN is in tablet form only.

For sale by druggists. A regular size \$1.25 bottle (100 tablets) mailed to physicians with full literature and clinical reports on receipt of \$1.00.

A. M. A. Principles of Ethics:

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

FOR EVERY DOCTOR A SQUARE DEAL

The medical profession is surely aroused.

The doctor is thinking.

Quackery has got a chill.

The secret-nostrum evil is quaking in its boots.

Rum-remedy venders and drug-habit makers, who, worse than "wolves in sheep's clothing", carry on their nefarious work under the guise of "medicine", are getting blue at the gills, and the great houses who, as the ultra of all things ethical, exploit the doctor while making "dope for quackery" on the side are wondering (and they'll not have long to wait) when their turn will come.

There's the picture, the outline is right, the color is true, and when at last the doctor wakes up and demands his rights, as he certainly will, there'll be "something doing".

Just as surely as medical quackery and fraud will get their just deserts, just as surely as dishonesty in both professions will ultimately be beaten out of existence by the ethical doctor and legitimate pharmacy, just so surely, at the demand of this same great power, will uncertain therapy be forced to give way to certain therapy—a condition only possible when active-principle content of vegetable drugs, and accuracy and purity of all, is alone considered.

And then (always demanding and only satisfied with the best of everything and refusing longer to be a door-mat for selfish commercialism), just so surely will the manufacturer be forced to recognize his power—his right—and to treat the doctor accordingly.

That's where we stand—that's where we have stood for twenty years—and we ask your co-operation.

A POCKET CASE OF ACTIVE PRINCIPLES FREE

We are headquarters for the active principles and other concentrate, true blue remedies in granule and tablet form ready to dispense, for the physician and pharmacist alike at the same price. If you are interested, send for samples. Write, mentioning this advertisement and this journal, enclosing ten two cent stamps, and we will send you, postage paid, a neat pocket case filled with representative, single active principles and a copy of Abbott's Alkaloidal Digest, containing the gist of Active-Principle Therapy. Will you write?

A New Wrinkle

in wall plate construction is embodied in the apparatus shown, this being the **New MacLagan Wire Rheostat**, an instrument superior in **durability, uniformity, control and compactness.**

The McIntosh No. 6 Galvanic and Faradic Wall Cabinet as illustrated, embraces other features of equal merit with the new rheostat, such as our improved Milliamperemeter with Shunt, Graduated Automatic Rheotome and a large Faradic Coil, together with controlling switches of neat design.

Its Sources of Energy are numerous and varied, including dry or wet cells, direct currents of 110, 220 or 500 volts and alternating currents.

The Modalities Available include a full range of Galvanic Currents, continuous or interrupted, adaptable in Gynecology, Genito-Urinary Work, Rectal treatment, Cataphoresis, Electrolysis, Electro-Diagnosis, Lighting Diagnostic Lamps, and Faradic Currents for Anaesthetic Effects, and Muscular Contraction or Massage.

The Price Will Appeal to You

Our latest catalogue, No. 26 T, shows a great profusion of designs in Wall Plates, Batteries, Electrodes, Cautery Appliances, Sinusoidal Apparatus, etc. Our goods conform to the highest standards in design, workmanship and finish, and will satisfy the most critical eye, while they are priced at most popular figures. A postal will put you in touch with us.

COLLARGOLUM

(Soluble metallic silver)

UNGUENTUM CREDE

(1% Collargolum Ointment)

check beginning sepsis and are powerful weapons even in desperate infectious processes. Clinical experience recorded in a literature of over 150 reports shows their efficacy and harmlessness.

CREOSOTAL HEYDEN**DUSTAL HEYDEN**

Bland carbonates of the caustic creosote and guaiacol. Even 1½-dram doses are well borne. Hundreds of

publications evidence their value in phthisis, pneumonia, typhoid fever, bronchitis, etc.

ORPHOL

(Betanaphthol-Bismuth-Heyden)

The astringent antiseptic par excellence in all enteric fermentative processes. Innocuous, inodorous, tasteless.

It rapidly eliminates the toxalbumins and soothes inflamed mucous membranes.

Literature supplied by

SCHERING & GLATZ, New York.

How to Feed the Baby—

Is often a perplexing question when mother's milk is insufficient, either in quantity or quality. Pure cow's milk is not always available, and most of the proprietary substitute foods are deficient in fat. Even cow's milk, although containing the requisite fat, is somewhat deficient in carbohydrates. But Winters says: "Children get over slight chemical differences in cow's milk much more readily than they do physical differences—those due to contamination." And Jacobi states: "Clean milk is far more important than any amount of modification."

Highland Brand Evaporated Cream

Which is simply good cow's milk reduced two and one-half times by evaporation and sterilized, overcomes all danger of contamination. Further than that it is more readily digestible than either raw, pasteurized or boiled milk. In short, it is far preferable to ordinary cow's milk from every standpoint. It is the simplest, most uniform and satisfactory substitute food. Trial quantity on request.

A. M. A. Principles of Ethics

"It is equally derogatory to professional character for physicians to disclose or promote the use of secret remedies."

Akaralgia

A REMEDY FOR
MIGRAINE

"**T**HE keynote of success in the treatment of Migraine is in the simplicity and palatability of effective medication," and herein lies the great value of this formula which enables one to treat successfully an essentially chronic condition by giving a single dose of medicine in a day.

"I know," says the author, "That this prescription may be given for an indefinite length of time (years if necessary), without losing its great therapeutic value or producing disgust for it on the part of the patient. I have yet to find an adult patient who would not continue the taking of this medicine as long as I desired. This medicine, moreover, is not contra-indicated by any condition of the stomach. It is, in fact, one of the most valuable formulas I have found for the treatment of chronic gastric catarrh and chronic ulcer of the stomach. On the other hand, 'a bad stomach' is a further indication for its extended use. I wish especially to insist that the use of this formula will give better results than the separate use of the various medicines which it contains."

FORMULA:

Each dessertspoonful contains:

R—Sodii sulphas (dry)	30 grains
Sodii salicylas (Merrell)	10 grains
(From Natural Wintergreen Oil)	
Magnesii sulphas	50 grains
Lithii benzoas	5 grains
Tinctura nucis vomicae	6 minims

DOSE:—Acute attack—One dessertspoonful dissolved in four ounces of water every two hours until relief is obtained.

Chronic Condition—One dessertspoonful every morning one-half hour or more before breakfast.

Bottle cap contains one dessertspoonful.

THERAPY.

SODIUM SALICYLATE—Merrell—From Natural Wintergreen Oil, is the remedy par excellence of the prescription. It acts as an intestinal antiseptic, and increases the functional activity of the liver.

MAGNESIUM SULPHATE is necessary to overcome the constipation present in nearly all cases; by its use we unload the portal circulation and eliminate the poisons through the intestinal canal.

SODIUM SULPHATE acts very much in the same manner with increased cholagogue action.

LITHIUM BENZOATE is an intestinal antiseptic, and acts as an eliminant through the kidneys.

NUX VOMICA in small doses acts as a stomachic, improves the appetite and overcomes constipation from atony by stimulating peristalsis.

Generally Prescribed "AKARALGIA--1 BOT."

THE AKARALGIA formula is prepared exclusively for use under the physician's directions. Each package is marked, "To be dispensed on a physician's prescription with carton and label removed" and neither the bottle, cap nor cork bears a distinctive mark. Pharmaceutically this formula is—Granular Effervescent Sodium Salicylate Compound—but for convenience in prescribing the preparation is called—Akaralgia. This name is also a protection against substitutes and a guaranty to the physician and patient that the most important ingredient—Sodium Salicylate—is made from unadulterated Natural Wintergreen Oil.

The original paper "A New Remedy and a Cure for Migraine," by———M. D. mailed upon request.

White & Martin's Genito-Urinary and Venereal Diseases

BY J. WILLIAM WHITE, M. D.

Professor of Surgery, University of Pennsylvania.
AND

EDWARD MARTIN, M. D.

Professor of Clinical Surgery, University
of Pennsylvania.

Octavo. 1092 pages. 15 colored plates. 300 text
illustrations. Cloth \$6.00. Sheep \$7.00.

It is the long expected sixth revised and enlarged edition, just issued, of the most concise, lucid, thorough, modern, and practical book on the subject in the English language. The new features in the index must be seen to be appreciated.

Krehl's Principles of Clinical Pathology

BY LUDOLF KREHL.

Translated from the Third German Edition and
Edited by A. W. HEWLETT, M. D. With an
introduction by WM. OSLER.

Octavo, 504 pages, illustrated. Cloth, \$5.00.

In Professor Krehl's book we have an exposition of a branch of pathology that has hitherto received but little attention from the profession in this country. Disease is here treated as a perversion of physiological function. To the physician this point of view is of fundamental importance, for he is dealing essentially with abnormalities of function.

The work is recognized as authoritative in Germany, and it has been translated into at least five other languages. To the American profession no other introduction is necessary than that given to it by Dr. Wm. Osler.

MAGNIFICENT NEW FIRE-PROOF HOSPITAL TO BE ERECTED BY THE CLARA BARTON HOSPITAL

A Corporation organized under the Laws of California and at present conducting a private hospital at 502 Geary Street, corner Taylor

The new hospital will be erected on a lot 85 x 137½ feet, located on Post Street, between Franklin and Gough Streets, one block west of Van Ness Ave. It will be seven stories and basement, of brick and steel construction, instead of six stories as above pictured, and will be absolutely fire-proof; will contain 110 rooms and will be ready for occupancy about January 1st, 1907.

The hospital is to be modern and first-class in every respect, with many original features. The top floor will have a superb operating outfit with three unsurpassed operating rooms. Three rooms are to be devoted to hydrotherapy, and physicians may have their neurasthenics scientifically treated by hydrotherapeutic measures.

The company is issuing five and six per cent registered gold bonds. These bonds are secured by a mortgage and are sold to reputable physicians by subscription only. A stock bonus is given every purchaser.

For further information regarding the bonds as to terms, allotment and bonus, address,

A. M. A. Principles of Ethics:

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

To the Members of the Society:

The treatment of alcoholism and drug habits by the proper use of hyoscin hydrobromat has passed the experimental stage and has a recognized place in medicine.

All writers on the subject agree that the "hyoscin treatment" must not be undertaken save under certain well recognized conditions; in other words, he who would use this treatment successfully must be properly equipped.

This is just what I have undertaken. For several years I have been devoting my time almost entirely to this treatment and to a careful study of the subject in general. A well equipped Sanitarium, nurses trained in the handling of these patients and in the treatment itself, and several years of careful study on my own part, are the things which should count with my colleagues.

Your patients, if referred to me for treatment for these habits, will receive my very best attention; as yet, no patient has been thus treated who has not been cured.

Respectfully,

R. E. Bering, M. D.

TULARE, CALIF.

The Hospital of the Good Samaritan

ESTABLISHED 1887

934 WEST SEVENTH STREET, LOS ANGELES, CAL.

The Hospital of the Good Samaritan is an institution of 100 beds for patients, a diocesan hospital owned and managed by the Episcopal church in Southern California, but undenominational in its benefits, being a general hospital for the reception of patients, irrespective of nationality or creed. The hospital does not have an attending staff and is open to all reputable physicians, especial effort being made to serve the profession as a whole. The hospital has a house pathologist, and furnishes all laboratory work free to those in moderate circumstances.

FOOD AND DIET

The hospital is provided with a main kitchen and five diet kitchens, equipped with steam cooking utensils. All dishes used in the hospital are sterilized after each meal. The hospital controls a private dairy ranch, insuring patients the purest milk and farm products. The drinking water is passed through Pasteur filters and then sterilized under high pressure.

OPERATING ROOMS

These rooms are four in number, and used for different purposes. The main operating pavilion, of six rooms, is considered most modern and complete.

OBSTETRICAL DEPARTMENT

This department consists of a confinement, an operating, and a sterilizing room and a nursery with incubator.

CHILDREN'S DEPARTMENT

This is especially equipped for Orthopedic Surgery, having an X-Ray room, plaster room, electricity and massage rooms and gymnasium; also a sun room for the administration of Violet rays in tubercular joint disease.

THE HOSPITAL SIGNAL AND TELEPHONE SYSTEM

This system has been installed throughout the building.

PROVISION FOR ALL CLASSES

There are elegant suites and apartments, with private baths and telephones; for those who desire luxurious accommodations, and the hospital is also prepared to take care of those in moderate circumstances.

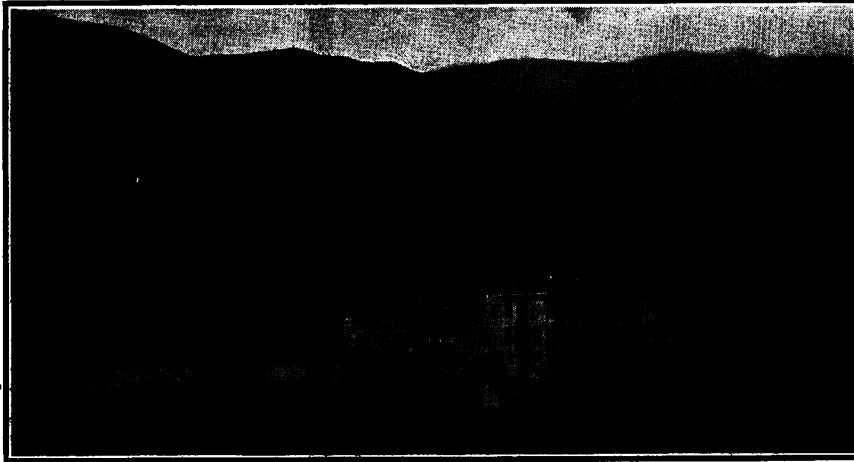

TRAINING SCHOOL FOR NURSES

This school gives a three years' graded course. The work of each year consists of eighty didactic lectures, on ten different branches, by physicians and surgeons; fifty classroom instructions, given by the Superintendent and Head Nurses of the various departments, including practical work in cooking, massage, electricity and medical gymnastics, and general medical and surgical duty, special duty, operating room service, service in the children's department and in the obstetrical department.

CLARK'S SANITARIUM

For the care and treatment of Mental and Nervous Diseases and of Morphine and Alcoholic Habits, was established by Dr. Asa Clark, Medical Superintendent of the California State Hospital at Stockton.

The Sanitarium is located in the southwestern part of the City of Stockton and is surrounded by pleasant grounds, containing forty acres. The buildings are two stories in height and cover one acre. Their sanitary condition is perfect. The corridors are wide, airy and light, affording the patients who cannot be trusted out in the grounds, and all others on wet days, ample room for exercise. The appointments are modern and comfortable.

All Modern Electrical, X-Ray, Massage and Electro-Therapeutic Appliances

The food supplies and cooking are of the best; the milk, butter chickens and eggs being products of the place and abundant. Any patient may have a special attendant, if necessary, at a moderate additional cost.

Charges Moderate

Address for further information DR. F. P. CLARK, Medical Supt., or J. M. ANDERSON, Business Manager

DR. PETTEY'S RETREATS

Devoted exclusively to the treatment of

ALCOHOL AND DRUG ADDICTIONS

Memphis, Tenn., Denver, Colo. and Oakland, Calif.

These Institutions are owned and controlled by reputable physicians and are conducted upon strictly ethical lines. They were opened and are maintained solely for the purpose of treating the ALCOHOL AND NARCOTIC DRUG ADDICTIONS by methods based upon the original investigations of Dr. Geo. E. Pettey of Memphis, Tenn., and first published to the profession by him in 1901. (See Therapeutic Gazette, Oct. 1901.)

The method of treatment introduced by Dr. Pettey removes these addictions from the list of almost incurable diseases and renders them the most certainly and readily curable of all the chronic ailments.

To be admitted to either of these three classes, applicant must have good health, good general education, good address, enthusiasm in the work, be between the ages of 20 and 35, have certificate of health from a physician and letters from two responsible persons as to character.

ADDRESS, DIRECTOR CALIFORNIA HOSPITAL, 1414 SOUTH HOPE ST., LOS ANGELES.

Patients suffering from Laryngeal or Pulmonary Tuberculosis not admitted to this hospital.

A. M. A. Principles of Ethics:

"It is equally derogatory to professional character for physicians to dispense or promote the use of secret remedies."

THINK THIS OVER

Digestion Depends Upon Absorption

If the digestive tract cannot absorb what is digested then digestion stops. Why should you plaster the mucosa with bismuth or shrivel and harden it with bitters when you want to aid digestion and absorption?

(Wrong stimulation is always followed by a reaction.)

Wash off the mucosa by drinking pure water the first thing in the morning and then use

PEPTENZYME

(Nucleo-Enzymes R. & C.)

which stimulates the absorption in nature's own manner, at the same time aiding digestion.

Think this over again and then write for literature and samples and prove for yourself that Peptenzyme differs radically from all other so-called digestives.

REED & CARNRICK, 42-44-46 Germania Ave., Jersey City, N. J.

Not to be confounded with so-called "apiol," which is merely an oil of parsley containing more or less of the true active principle, apiole. Professor Laborde's experiments (on animals) prove apiole to have emmenagogue properties, which stimulate the nerve ends of the ovaries and uterus, thus inducing vascular dilatation of the genito-spinal tract.

Dispensed in capsules of 4 minims each.

Dose. One, morning and evening before and during menstruation.

Agents, E. FOUGERA & CO., New York
